CAREER SUMMARY

Software Engineer and IT Specialist experienced in developing internal web applications, administering enterprise infrastructure, and delivering operational solutions within large-scale manufacturing environments.

EXPERIENCES

Hyundai Mobis | Montgomery, Alabama, USA

Aug 2025 – Current

IT Specialist

- Developed a Business Intelligence dashboard to track and manage daily materials requirements for the logistics team to streamline daily material management routines.
- Developed an offline-capable QR code web app used for production line onboarding streamlining workstation sign-ins for new hires and providing scannable data for production under restricted-network environments.
- Coordinated MES/WCT requests with production departments and analyzed WCT data to investigate production downtime, validate MES-related faults, and clarify misattributed issues.
- Managed IT administration for 90+ users, including onboarding, offboarding, and end-user support, while administering Cisco ISE and NAC solutions for 100+ endpoints and managing network access exceptions.
- Managed \$1M+ in annual IT operational expenses with SAP financial processing, including budgeting and procurement coordination; coordinated a \$960K supplemental operating budget request and developed an internal expense tracking solution used for operational forecasting and annual budget planning.
- Coordinated IT planning and management for multiple projects supporting EV, HEV, & ERED production lines, including 250+ registered IT asset lifecycle operations.
- Led a conference room modernization initiative converting standard meeting rooms into hybrid conferencing environments, enabling cross-site collaboration between Hyundai Mobis plants and external partners.
- Collaborated with HQ in South Korea on IT asset and cybersecurity audits, ensuring global compliance.

PROJECTS

Link Shortener Web App | Full Stack Developer | Remote, USA

Jun 2023 - Sep 2023

- “bit.ly”-like web application that creates a short URL; utilized Next.js, Auth.js, Prisma, and TailwindCSS
- Analytics including click count, IP Location, and UTM tracking.

Toyota Financial Services | Software Engineer | Plano, Texas, USA

Jan 2023 - May 2023

- Developed a prototype employee rewards system leveraging internal cryptocurrency for Senior Design project at UTD
- Built a RESTful API with Express to interface with React frontend, ERC20 Smart Contract, and a MySQL database
